

## EcoSeal for Corrosion

**EcoSeal Finest and Fortify**, a fusion of Nano metal oxides, Nano-polymers and water, seal and protect any surface, hard or soft, from corrosion, atmospheric pollutants, static, UV and soil accumulation. See tech data for more info.

**EcoSeal Fortify** on marine instrument kept clean for 4 months. Without, failed at 30 days.

**EcoSeal Rust Kote** with Nano particles penetrates through to base metal, converts rust to an inert mineral and prevents further rusting. May be painted over. See tech data for more info.

**EcoSeal Tank Coat 160** Nano Cycloaliphatic Amine Epoxy integrates with, coats and protects steel and concrete in the most extreme atmospheres and uses. See tech data for more info.

*When surfaces are properly cleaned with EcoSeal's eco-friendly, synthetic cleaners, then coated with our appropriate coating, extreme protection against the most demanding use happens.*
