

# EcoSeal Fortify

Protects, insulates, improves the appearance and extends the life of your home, office, factory, warehouse or agricultural buildings.

Natural Nano-sized minerals work like sun screen to protect exterior surfaces and sealing components protect from pollutants.

## HYDROPHOBIC

Protects siding from moisture, acid rain, UV and atmospheric pollutants

## HYDROPHYLIC

Improves LoE and single pane glass insulation. Strengthens glass against abrasion, acid rain etching and UV degradation.

## UV PROTECTANT

Protects vinyl trim and glazing from UV embrittlement, chalking and atmospheric pollutants

**NOTE:** Bottom edge of shingles above the window are showing green mold stains 18 months after power washing. Those beside the window, protected with **EcoSeal Fortify**, are sealed from pollutants, mold and mildew stains, moisture, and acid rain.
