

EcoSeal Calci-cure & Fortify

EcoSeal Calci-cure cleans rust stains from 316 grade Stainless Steel entry lights and crash posts (bollards) at **Providence Bank of Texas**.

Once cleaned and dry, **EcoSeal Fortify** seals and protects the Stainless Steel from further rust, corrosion and soil adhesion. Finished bollards below have kept “like new” appearance for over three years.

Stainless posts rusted from concrete finishing

Closer view

Close-up showing stains progressing

Post with **EcoSeal Calci-cure** applied

Post rinsed, Fortify'd and buffed

Center safety light posts (bollards) cleaned and drying to be sealed with **EcoSeal Fortify** to prevent re-rusting.

Sealed with **EcoSeal Fortify** to protect from rust and corrosion with an invisible Nano polymer metal oxide fusion which integrates with the Stainless Steel surface.
